Project number	29
Project Title	Cart Genie
Document	DASS Project Concept Document
Creation date	24-01-2024
Created By	Rudransh, Kushagra Dhingra, Hardik Kalia, Chinmay Sharma
Client	Sameera (Founder and Mentor Cart Genie)

Description

The project addresses the problem of tracking deliveries and returns across multiple e-commerce platforms. This problem stems from growth of online shopping and emergence of various e-commerce platforms to fulfill demands. Our application will address this problem by scraping details from text messages and provide an organized infographic.

Profile of Users

Our target demographic comprises tech-savvy shoppers in India, including millennials, young professionals, and families who seek convenience. These users engage regularly in online shopping, particularly in social media marketplaces, the app aims to enhance their overall shopping experience.

Usage Model and Diagrams

Basic UI for the Entire App:

- 5 screens (dark and light mode) :
 - Sign-up Page: Email ID, phone number, name, etc.
 - Sign-in Page: User-name (details to be finalized) and password.

- Summary of Orders: Displaying all orders with basic functionalities like sort, filter, order, etc.
- Detailed Description of a Product: Clicking on a particular order will display a detailed description.
- FAQ, Report any Problem.
